

Memorandum

May 13, 2016

From: Brian Shand, Alberta Utilities Commission

To: Howard Wallace, Alberta Energy Regulator

Issue: ATCO Pipelines Radiographic Weld Inspections

As we have discussed, ATCO Pipelines has formally advised both the Alberta Energy Regulator (AER) and the Alberta Utilities Commission (AUC) with respect to concerns regarding potentially substandard radiographic inspections of prefabricated piping assembled in ATCO's welding shop. The AUC will take the lead role in investigating this issue and will update the AER with respect to its progress.
